As of today 03/16/02, the Bfn planogram still not done 100%, as outlined on the tour dated 03/13/02. This is unacceptable!!!!!! The front endcap still not signed, backstock not worked, snugride callback not completed, kick & play / s 1st bouncer still out of place and no display set on top of the deck.....

You have till MONDAY 7:00am to complete this project. I will not accept anymore excuses on why isn't done.

Bfn Tour: Planograms gondola/deck/deck end/ done all upl up. All backstock worked including boards on container/top bars/stockroom. All displays set on the deck as per pogo. No bfn product left on ale stockroom/all have to go in to the container. Thanks Jaime

I finished the planogram for the baby furniture deck. I will check for back stock tomorrow. will straighten the other side tomorrow (shelf)

I hope that my recovery is up to standard this time.

Lost of the tour for the night was done.

Thanks,
 Myrna
